Contents

UNIT 1 INTRODUCTION

UNIT 2 CONVENTIONAL ENERGY

UNIT 3 NON-CONVENTIONAL ENERGY

UNIT 4 BIOMASS ENERGY

UNIT 5 ENERGY CONSERVATION

UNIT 1 INTRODUCTION	1.00 - 1.80
1.1. Introduction to energy	1.1
1.2. Units of energy	1.2
1.3. Conversion factors	1.2
1.4. General classification of energy	1.3
1.5. Sources of energy	1.5
1.5.1. Conventional or non-renewable energy sources	1.5
1.5.1.1. Advantages of conventional energy sources	1.7
1.5.1.2. Limitations of conventional energy sources	1.8
1.5.2. Non-conventional or Renewable Energy (RE) sources.....	1.9
1.5.2.1. Advantages of Renewable Energy (RE) sources	1.10
1.5.2.2. Limitations of Renewable Energy (RE) sources	1.10
1.5.3. Renewable vs. Non-renewable energy sources	1.11
1.6. World energy resources and energy consumption	1.12
1.6.1. World's energy consumption by primary energy source	1.13
1.6.2. India's energy consumption by primary energy source ...	1.17
1.6.3. World primary energy consumption by countries	1.18
1.7. World present conventional energy status	1.21
1.7.1. Coal power	1.22
1.7.2. Natural gas power	1.23
1.7.3. Nuclear power	1.23
1.8. Indian energy resources and energy consumption	1.24
1.8.1. Conventional energy mix in India	1.24
1.8.2. Energy consumption	1.26
1.8.3. Primary energy supply	1.28
1.8.4. Energy production	1.28
1.9. Energy crisis	1.30
1.10. Energy alternatives	1.30
1.10.1. Development of renewable energy in India	1.31
1.11. Prospects of worldwide renewable energy sources	1.32
1.11.1. Hydropower	1.34
1.11.2. Wind energy	1.36
1.11.3. Bioenergy	1.36
1.11.4. Solar energy	1.36

	1.11.5. Geothermal energy	1.37
1.12.	<i>Prospects of Indian renewable energy status</i>	1.39
	1.12.1. Biomass energy	1.41
	1.12.2. Hydropower	1.41
	1.12.3. Solar energy	1.43
	1.12.4. Wind energy	1.44
	1.12.5. Geothermal energy	1.46
	1.12.6. Tidal power	1.46
1.13.	<i>Global potential of various renewable energy sources</i>	1.47
	1.13.1. Hydroelectric potential	1.48
	1.13.2. Wind energy potential	1.49
	1.13.3. Bioenergy potential	1.50
	1.13.4. Solar energy potential	1.51
	1.13.5. Geothermal energy potential	1.53
	1.13.6. Ocean tidal energy potential	1.53
	1.13.7. Ocean wave energy potential	1.54
	1.13.8. Ocean Thermal Energy Conversion (OTEC) potential	1.54
1.14.	<i>Indian renewable energy potential</i>	1.55
	1.14.1. Solar power potential	1.55
	1.14.2. Wind energy potential	1.56
	1.14.3. Biomass energy potential	1.58
	1.14.4. Hydroelectric energy potential	1.59
	1.14.5. Small Hydro Power (SHP) potential	1.59
	1.14.6. Tidal energy potential	1.60
	1.14.7. Geothermal energy potential	1.60
1.15.	<i>Availability of renewable and non-renewable energy sources</i>	1.61
	1.15.1. Oil reserves	1.61
	1.15.2. Natural gas reserves	1.63
	1.15.3. Coal reserves	1.64
	1.15.4. Nuclear energy reserves	1.65
	1.15.5. Hydro-electric reserves	1.66
	1.15.6. Other renewable energy availability	1.66
1.16.	<i>Two mark questions and answers</i>	1.68
1.17.	<i>Solved questions</i>	1.79

UNIT 2 CONVENTIONAL ENERGY	2.00 - 2.63
2.1. Conventional energy resources	2.1
2.2. Layout and working principle of thermal power plant	2.3
2.2.1. Applications, merits and demerits of thermal power plants ...	2.5
2.3. Efficiency of thermal power plants	2.5
2.4. Hydro electric power plants	2.7
2.4.1. Layout of hydro-electric power plant	2.8
2.4.2. Selection site for hydroelectric power plant	2.10
2.4.3. Applications of hydro-electric power plant	2.10
2.4.4. Efficiency of hydro-electric power plant	2.11
2.4.4.1. Pelton wheel or Pelton turbine	2.11
2.4.4.2. Work done and efficiency of a Pelton wheel.....	2.13
2.4.4.3. Velocity diagram of a Pelton wheel	2.14
2.4.4.4. Head and power of a Pelton wheel	2.16
2.4.4.5. Efficiencies of a Pelton wheel	2.17
2.4.5. Merits and demerits of hydro-electric power plant	2.18
2.5. Nuclear power plant	2.19
2.5.1. Main components of a nuclear power plant	2.19
2.5.2. Working of a nuclear power plant	2.20
2.5.3. Main components of a nuclear reactor	2.21
2.5.4. Boiling Water Reactor (BWR)	2.24
2.5.5. Pressurised Water Reactor (PWR).....	2.26
2.5.6. CANDU (Canadian-Deuterium-Uranium) reactor	2.28
2.5.7. Fast breeding reactors	2.29
2.5.7.1. Fast breeder technology	2.29
2.5.7.2. Types of fast breeding reactors	2.30
2.5.8. Gas cooled Fast Breeding Reactor (GFBR)	2.30
2.5.9. Liquid-Metal Cooled Fast Breeder Reactor (LMFBR).....	2.32
2.5.10. Sodium cooled Fast Breeder Reactor (SFBR)	2.33
2.5.11. Lead-cooled Fast Breeder Reactor (LFBR)	2.34
2.5.12. Efficiency of nuclear power plant	2.36
2.5.13. Selection site for nuclear power plants	2.36
2.5.14. Merits and demerits of nuclear power plants.....	2.37
2.6. Fuels	2.38

2.7.	Combustion process	2.38
2.7.1.	Generalized combustion equation for any hydrocarbon fuel ..	2.40
2.7.2.	Stoichiometric air-fuel ratio or minimum quantity of air ...	2.40
2.7.3.	Actual air-fuel ratio and excess air	2.41
2.7.4.	Equivalence ratio	2.41
2.7.5.	Time loss factor	2.41
2.7.6.	Determination of air supplied per kg of fuel	2.41
2.7.7.	Flue gas analysis	2.41
2.7.8.	<i>Solved problems on combustion process</i>	2.42
2.7.9.	<i>Solved Anna University problems on combustion process</i> ...	2.45
2.8.	Fluidized Bed Combustion (FBC)	2.46
2.8.1.	Advantages of fluidized bed combustion system	2.46
2.8.2.	Types of fluidized bed combustion system	2.47
2.8.3.	Bubbling Fluidized Bed (BFB) combustion system	2.47
2.8.4.	Circulating Fluidized Bed (CFB) combustion system	2.48
2.8.5.	Pressurized fluidized bubbling bed combustor	2.50
2.8.6.	Pressurized circulating fluidized bed combustor	2.51
2.9.	Two mark questions and answers	2.52
2.10.	Solved questions	2.61

UNIT 3 NON-CONVENTIONAL ENERGY 3.00 - 3.159

3.1.	Solar energy	3.1
3.1.1.	Types of solar radiation	3.2
3.1.2.	Extraterrestrial and terrestrial solar radiation	3.2
3.1.3.	Solar radiation geometry	3.3
3.1.4.	Sun at zenith and air mass (m)	3.6
3.1.5.	Attenuation of beam radiation	3.6
3.1.6.	Clarity index and concentration ratio	3.7
3.1.7.	Solar insolation	3.8
3.1.8.	Day length, sunrise and sunset	3.8
3.1.9.	Local solar time or local apparent time	3.8
3.1.10.	Apparent motion of sun	3.9
3.2.	Estimation of solar energy	3.10
3.2.1.	Estimation of average solar radiation	3.10

3.2.2.	Solar radiation on an inclined surface	3.11
3.2.3.	<i>Solved problems on estimation of solar radiation</i>	3.13
3.2.4.	<i>Solved Anna University problems on estimation of solar radiation</i>	3.16
3.3.	Solar thermal systems	3.25
3.3.1.	Types of solar collectors	3.25
3.4.	Flat plate solar collectors	3.25
3.4.1.	Liquid heating collectors	3.26
3.4.2.	Modified flat plate collectors	3.27
3.4.3.	Solar air heaters	3.27
3.4.4.	Evacuated tubular collector	3.29
3.4.5.	Advantages, disadvantages and applications of flat-plate collectors.....	3.29
3.5.	Focusing or concentrating solar collectors	3.30
3.5.1.	Parabolic trough collector	3.31
3.5.2.	Paraboloidal dish collector	3.32
3.5.3.	Mirror strip reflector	3.33
3.5.4.	Fresnel lens collector	3.34
3.5.5.	Flat plate collector with booster mirrors	3.34
3.5.6.	Compound Parabolic Concentrator (CPC)	3.35
3.5.7.	Comparison of focusing and flat-plate collectors	3.36
3.5.8.	Advantages and disadvantages of focusing collectors	3.36
3.6.	Direct thermal applications of solar collectors	3.37
3.6.1.	Solar water heater	3.37
3.6.2.	Solar cooker	3.39
3.6.3.	Solar space heating.....	3.41
3.6.4.	Solar space cooling.....	3.42
3.6.5.	Solar distillation or solar still.....	3.44
3.6.6.	Solar refrigeration	3.45
3.6.7.	Solar crop dryer	3.47
3.6.8.	Solar pumping	3.50
3.6.9.	Solar furnace	3.51
3.6.10.	Solar chimney or ventilator	3.52
3.7.	Solar thermal power generation	3.53

3.7.1.	Low temperature thermal power generation using flat plate collector	3.53
3.7.2.	Solar ponds	3.54
3.7.2.1.	Types of solar ponds	3.57
3.7.2.2.	Applications of solar ponds	3.57
3.7.2.3.	Advantages and limitations of solar ponds	3.57
3.7.3.	Medium temperature thermal power generation using solar distributed collector	3.58
3.7.4.	High temperature thermal power generation using central receiver system	3.60
3.7.4.1.	Components of central receiver power plant	3.60
3.7.4.2.	Working of central receiver system	3.62
3.7.4.3.	Advantages and disadvantages of central receiver system ...	3.63
3.8.	<i>Solar energy applications in India</i>	3.64
3.9.	<i>Solar energy plantations</i>	3.64
3.10.	<i>Wind energy</i>	3.65
3.10.1.	Characteristics of wind energy	3.65
3.11.	<i>Site selection for wind systems</i>	3.66
3.12.	<i>Wind Energy Conversion Systems (WECS)</i>	3.67
3.12.1.	Principle of wind energy conversion	3.67
3.12.2.	Aerodynamics of wind turbine	3.68
3.13.	<i>Characteristics of windmill</i>	3.69
3.14.	<i>Wind mill or turbines components</i>	3.70
3.15.	<i>Types of windmills</i>	3.74
3.15.1.	Horizontal axis wind mill or turbine	3.74
3.15.2.	Vertical axis wind mill or turbine	3.75
3.16.	<i>Types of wind rotors</i>	3.78
3.16.1.	Darrieus rotor	3.78
3.16.2.	Savonius rotor	3.79
3.16.3.	Multiple blade type	3.80
3.16.4.	Musgrove rotor	3.80
3.16.5.	Evans rotor	3.80
3.16.6.	Growian rotor	3.80
3.17.	<i>Wind electric power generation</i>	3.81

3.17.1.	Remote or off-grid wind power plants	3.81
3.17.2.	Small scale or stand-alone wind turbines plants	3.81
3.17.3.	Medium scale wind turbines plants	3.82
3.17.4.	Hybrid wind power plants	3.83
3.17.5.	Grid connected wind power plants	3.83
3.17.6.	Wind farms	3.84
3.18.	<i>Wind power in India</i>	3.84
3.19.	<i>Economics of wind farm</i>	3.86
3.20.	<i>Ocean wave energy</i>	3.87
3.20.1.	Ocean wave energy potential	3.87
3.20.2.	Estimation of wave energy	3.87
3.20.3.	Concepts of ocean wave energy conversion	3.88
3.20.4.	Ocean wave power devices or ocean wave energy conversion devices	3.88
3.20.4.1.	Ocean wave profile devices	3.89
3.20.4.2.	Oscillating water column	3.92
3.20.4.3.	Wave power capture device	3.92
3.20.4.4.	Rotating wave devices	3.94
3.20.5.	Advantages and disadvantages of wave energy	3.94
3.21.	<i>Ocean Thermal Energy Conversion (OTEC)</i>	3.95
3.21.1.	Principle of OTEC	3.96
3.21.2.	Setting of OTEC plants	3.96
3.21.3.	Land-based power plant	3.97
3.21.4.	Floating power plant	3.97
3.21.5.	Thermodynamic cycles in OTEC	3.97
3.21.6.	Open cycle OTEC system	3.98
3.21.7.	Closed cycle OTEC system	3.99
3.21.8.	Site selection for OTEC plants	3.100
3.21.9.	Advantages of OTEC	3.100
3.21.10.	Disadvantages of OTEC	3.101
3.21.11.	Applications of OTEC	3.101
3.22.	<i>Tidal energy</i>	3.102
3.22.1.	Tidal energy potential	3.102
3.22.2.	Principle of tide generation	3.103

UNIT 4 BIOMASS ENERGY	4.00 - 4.81
4.1. <i>Energy from biomass</i>	4.1
4.2. <i>Biomass energy resources</i>	4.2
4.2.1. Advantages and disadvantages of biomass energy	4.2
4.3. <i>Biomass fuels</i>	4.3
4.4. <i>Principles of biomass conversion</i>	4.4
4.4.1. Photosynthesis process	4.4
4.5. <i>Biomass conversion methods</i>	4.5
4.6. <i>Physical or mechanical conversion of biomass</i>	4.5
4.6.1. Pre-treatment of biomass	4.6
4.7. <i>Agrochemical conversion of biomass</i>	4.7
4.8. <i>Thermochemical methods of biomass conversion</i>	4.8
4.8.1. Biomass direct combustion	4.8
4.8.2. Carbonisation	4.8
4.8.3. Pyrolysis	4.9
4.8.4. Gasification	4.10
4.8.5. Liquefaction	4.11
4.9. <i>Biochemical methods of biomass conversion</i>	4.12
4.9.1. Anaerobic digestion	4.12
4.9.2. Alcoholic fermentation	4.13
4.10. <i>Biogas production</i>	4.14
4.10.1. Conversion of raw materials to biogas	4.14
4.10.2. Biogas raw materials	4.15
4.10.3. Average composition of biogas	4.15
4.11. <i>Biogas digestion</i>	4.16
4.11.1. Anaerobic digestion process	4.16
4.11.2. Aerobic digestion process	4.18
4.11.3. Factors affecting digestion process	4.19
4.12. <i>Types of biogas plants</i>	4.21
4.12.1. Continuous process biogas plant	4.21
4.12.2. Batch process biogas plant	4.22
4.12.3. Dome and drum type biogas plant	4.23
4.13. <i>Classification of biogas plants or digesters</i>	4.23
4.13.1. Fixed-dome type biogas plant/digester	4.23
4.13.2. Floating drum type biogas plant/digester	4.24
4.13.3. Flexible bag type combined digester / gas holder	4.26
4.13.4. Floating gasholder type biogas plant/digester	4.26

4.14.	Advantages and disadvantages of biogas production	4.28
4.15.	Biomass gasifiers	4.28
4.16.	Types of biomass gasifiers	4.30
4.16.1.	Down draught gasifiers	4.31
4.16.2.	Up-draught gasifier	4.32
4.16.3.	Cross draught gasifier	4.33
4.16.4.	Fluidised-bed gasifier	4.34
4.17.	Ethanol production	4.35
4.17.1.	Ethanol production from sugarcane / corn	4.36
4.17.2.	Ethanol production from wood acid hydrolysis	4.38
4.18.	Fuel cell	4.40
4.18.1.	Working principle of a fuel cell	4.40
4.18.2.	Construction of a fuel cell	4.41
4.18.3.	Types of fuel cells	4.43
4.18.3.1.	Hydrogen-oxygen cell	4.44
4.18.3.2.	Solid polymer Electrolyte Membrane (PEM) fuel cells ...	4.45
4.18.3.3.	Alkaline fuel cells	4.46
4.18.3.4.	Phosphoric Acid Fuel Cells (PAFCs)	4.47
4.18.3.5.	Molten carbonate fuel cells	4.48
4.18.3.6.	Solid oxide fuel cells	4.50
4.18.3.7.	Hybrid fuel cells	4.51
4.18.4.	Advantages and disadvantages of fuel cells	4.51
4.18.5.	Applications of fuel cells	4.52
4.19.	Magneto Hydro Dynamic (MHD) power generation	4.53
4.19.1.	Principle of MHD power generation	4.53
4.19.2.	Open cycle MHD power plant	4.54
4.19.3.	Closed cycle MHD power plant	4.54
4.20.	Energy storage routes	4.55
4.20.1.	Thermal energy storage systems	4.56
4.20.1.1.	Sensible Heat Storage (SHS)	4.56
4.20.1.2.	Latent heat storage or Phase Change Material (PCM) storage ..	4.58
4.20.1.3.	Stratified heat storage	4.60
4.20.2.	Chemical energy storage	4.61
4.20.2.1.	Energy storage in hydrogen-oxygen fuel cell	4.62
4.20.2.2.	Battery storage	4.62
4.20.3.	Mechanical storage	4.63
4.20.3.1.	Pumped storage	4.63

4.20.3.2.	Compressed air storage	4.65
4.20.3.3.	Flywheels	4.66
4.20.4.	Electrical storage	4.67
4.21.	<i>Two mark questions and answers</i>	4.67
4.22.	<i>Solved questions</i>	4.78

UNIT 5 ENERGY CONSERVATION **5.00 - 5.40**

5.1.	<i>Energy conservation</i>	5.1
5.1.1.	Benefits of energy conservation	5.2
5.1.2.	Methods to conserve energy	5.2
5.1.3.	Steps for solving conservation of energy problems	5.3
5.2.	<i>Energy conservation in chemical process plants</i>	5.3
5.3.	<i>Energy audit</i>	5.5
5.3.1.	Types of energy audit	5.5
5.3.2.	Energy audit to optimize ammonia production	5.6
5.4.	<i>Heat exchangers</i>	5.7
5.4.1.	Working of heat exchanger	5.8
5.4.2.	Energy saving in heat exchangers	5.8
5.5.	<i>Distillation columns</i>	5.10
5.5.1.	Types of distillation columns	5.11
5.5.2.	Energy saving in distillation columns	5.12
5.6.	<i>Dryers</i>	5.13
5.6.1.	Types of dryers	5.14
5.6.2.	Energy saving in dryers	5.16
5.7.	<i>Ovens</i>	5.18
5.7.1.	Types of ovens	5.19
5.7.2.	Energy saving in ovens	5.19
5.8.	<i>Furnaces</i>	5.21
5.8.1.	Types of furnaces	5.21
5.8.2.	Energy saving in furnaces	5.23
5.9.	<i>Boilers</i>	5.25
5.9.1.	Types of boilers used in chemical plants	5.25
5.9.2.	Energy saving in boilers	5.26
5.10.	<i>Steam economy in chemical plants</i>	5.28

5.10.1.	Purposes of steam economy	5.28
5.10.2.	Methods of improving steam economy	5.29
5.10.3.	Advantages of steam economy	5.30
5.11.	<i>Two mark questions and answers</i>	5.31
5.12.	<i>Solved questions</i>	5.39

Solved Model Question Papers**MQ-1**
