

CONTENTS

UNIT I: INTRODUCTION 1.1 – 1.85

1.1. Introduction	1.1
1.2. Computer Aided Design (CAD)	1.1
1.2.1. What is CAD?.....	1.1
1.2.2. CAD Hardware and Software.....	1.1
1.2.3. Reasons for Implementing CAD.....	1.3
1.2.4. Benefits of CAD.....	1.3
1.2.5. Applications of CAD.....	1.4
1.2.6. Design Process in a CAD System (Elements of CAD System).....	1.5
1.3. Computer Aided Manufacturing (CAM)	1.8
1.3.1. What is CAM?.....	1.8
1.3.2. Applications of CAM.....	1.9
1.4. Manufacturing Planning Applications of CAM	1.9
1.4.1. Computer-Aided Process Planning (CAPP).....	1.9
1.4.2. Computer-Assisted NC Part Programming.....	1.10
1.4.3. Computerized Machinability Data Systems.....	1.11
1.4.4. Computerized Work Standards.....	1.12
1.4.5. Cost Estimating.....	1.13
1.4.6. Production and Inventory Planning.....	1.13
1.4.7. Computer-Aided Line Balancing.....	1.14
1.4.8. Summary.....	1.14
1.5. Manufacturing Control Applications of CAM	1.15
1.5.1. Process Monitoring and Control.....	1.15
1.5.2. Quality Control.....	1.17
1.5.3. Shop Floor Control.....	1.19
1.5.4. Inventory Control.....	1.19
1.5.5. Just-in-time Production Systems.....	1.20
1.5.6. Summary.....	1.20
1.6. CAD/CAM	1.21
1.7. CIM Concepts	1.23
1.7.1. What is Computer Integrated Manufacturing?.....	1.23
1.7.2. CIM Defined.....	1.23
1.7.3. Scope of CAD/CAM and CIM.....	1.24
1.7.4. Is CIM a Concept or a Technology?.....	1.25
1.7.5. Reasons for Implementing CIM [Why CIM?].....	1.25
1.7.6. Potential Benefits of CIM.....	1.26

1.8. Evolution of CIM	1.27
1.9. CIM Wheel.....	1.30
1.10. The New Manufacturing Enterprise Wheel [CASA/SME Manufacturing Enterprise Wheel]	1.31
1.11. Production Systems.....	1.34
1.11.1. Introduction	1.34
1.11.2. Types of Production Systems	1.35
1.11.3. Comparison between Types of Production.....	1.38
1.12. Introduction to Manufacturing Metrics.....	1.39
1.13. Mathematical Models of Production Performance	1.40
1.13.1. Cycle Time (T_c).....	1.40
1.13.2. Production Rate (R_p).....	1.41
1.13.3. Production Capacity	1.43
1.13.4. Utilization.....	1.44
1.13.5. Availability	1.46
1.13.6 Manufacturing Lead Time (MLT)	1.47
1.13.7. Work-In-Process (WIP).....	1.49
1.14. CIM Hardware And Software	1.53
1.15. Computerized Elements of a CIM System.....	1.54
1.16. Three-Step Process for CIM Implementation	1.56
1.17. Computers in CIM.....	1.59
1.17.1. Benefits of Using Computers in CIM	1.61
1.18. Computer Networks for Manufacturing.....	1.61
1.18.1. Importance of Computer Networks in Manufacturing	1.62
1.18.2. Components of Computer Networks for Manufacturing.....	1.62
1.18.3. Types of Computer Networks in Manufacturing.....	1.63
1.18.4. Network Architectures	1.65
1.18.5. Network Protocols in Manufacturing.....	1.67
1.19. The Future Automated Factory.....	1.68
1.19.1. Key Characteristics of a Future Automated Factory	1.68
1.19.2. Benefits of a Future Automated Factory	1.69
1.19.3. Challenges and Considerations	1.70
1.20. Management of CIM.....	1.70
1.21. Safety Aspects of CIM	1.72
1.22. Advances in CIM.....	1.75
Two Marks Questions and Answers.....	1.77
Review Questions.....	1.83

UNIT II: AUTOMATED MANUFACTURING SYSTEMS.....		2.1 -2.96
2.1.	Introduction to Automated Production Line.....	2.1
2.1.1.	What is an Automated Production Line?.....	2.1
2.1.2.	General Configuration of Automated Production Line	2.2
2.2.	System Configurations of Automated Production Line.....	2.2
2.2.1.	In-Line Configuration	2.2
2.2.2.	Segmented In-Line Configuration.....	2.3
2.2.3.	Rotary Configuration.....	2.4
2.3.	Work Part Transfer Mechanisms.....	2.4
2.3.1.	Synchronous Transport System	2.5
2.3.2.	Asynchronous Transport System.....	2.5
2.4.	Introduction to Automated Assembly System	2.5
2.4.1.	What is an Automated Assembly System?	2.5
2.4.2.	Requirements of Automated Assembly System	2.6
2.4.3.	Components of an Automated Assembly System.....	2.6
2.4.4.	Applications of Automated Assembly Systems.....	2.7
2.5.	System Configuration of Automated Assembly System	2.7
2.5.1.	In-Line Assembly	2.8
2.5.2.	Dial Type Assembly	2.8
2.5.3.	Carousel Type Assembly	2.9
2.5.4.	Single Machine Assembly.....	2.9
2.6.	Part Delivery at Automated Assembly Workstations.....	2.10
2.6.1.	Hopper.....	2.11
2.6.2.	Parts Feeder.....	2.11
2.6.3.	Selector and/or Orientor	2.12
2.6.4.	Feed Track.....	2.12
2.6.5.	Escapement and Placement Device.....	2.13
2.7.	Design for Automated Assembly.....	2.14
2.7.1.	What is meant by Design for Automated Assembly?.....	2.14
2.7.2.	Principles of Design for Automated Assembly	2.14
2.7.3.	Benefits of DFA in Automated Assembly	2.15
2.7.4.	Challenges in Designing for Automated Assembly.....	2.16
2.7.5.	Example of Automated Assembly Design.....	2.16
2.8.	Overview of Material Handling Equipment.....	2.16
2.8.1.	What is Material Handling?	2.16
2.8.2.	Types of Material Handling Equipment.....	2.17
2.9.	Consideration in Material Handling System Design.....	2.18
2.9.1.	Design Considerations.....	2.19

2.10. The 10 principles of Material Handling	2.22
2.10.1. Planning Principle	2.23
2.10.2. Standardization Principle	2.23
2.10.3. Work Principle.....	2.24
2.10.4. Ergonomic Principle.....	2.24
2.10.5. Unit Load Principle	2.24
2.10.6. Space Utilization Principle.....	2.25
2.10.7. System Principle.....	2.25
2.10.8. Automation Principle	2.25
2.10.9. Environmental Principle.....	2.26
2.10.10. Life Cycle Cost Principle	2.26
2.11. Conveyor Systems.....	2.26
2.12. Types of Conveyors	2.27
2.12.1. Belt Conveyors.....	2.27
2.12.2. Gravity Roller Conveyors	2.28
2.12.3. Motorized Roller Conveyors	2.28
2.12.4. Slat Conveyors	2.29
2.12.5. Chain Conveyors.....	2.29
2.12.6. Overhead Conveyors.....	2.30
2.12.7. Monorail Conveyors.....	2.31
2.12.8. Cart-On Track Conveyor	2.31
2.12.9. Skate Wheel Conveyor.....	2.32
2.12.10. Other Conveyor Types	2.32
2.13. Operations and Features.....	2.32
2.13.1. Classification of Conveyor Systems Based on Motion of the Transported Materials.....	2.32
2.13.2. Classification of Conveyor Systems Based on Operational Design	2.33
2.14. Introduction to AGVs	2.35
2.14.1. What are Automated Guided Vehicles (AGVs)?	2.35
2.14.2. AGVs Vs. Other Conventional Material Equipment (Why choose AGVs over traditional material handling equipment?).....	2.36
2.14.3. Components of AGVS.....	2.36
2.15. Types of AGVs.....	2.37
2.15.1. Guided Driverless Trains (Towing Vehicles)	2.37
2.15.2. Guided Pallet Trucks	2.38
2.15.3. Guided Unit Load Carriers.....	2.39
2.16. Vehicle Guidance Technology (AGVS Guidance System).....	2.39
2.16.1. Types of AGV Guidance Approach.....	2.39

2.16.2. Types of Vehicle Guidance Technologies.....	2.40
2.17. Vehicle Management.....	2.45
2.17.1. Traffic Control.....	2.45
2.17.2. Vehicle Dispatching.....	2.47
2.17.3. Vehicle Safety.....	2.48
2.18. Storage System Performance.....	2.49
2.18.1. What is a Material Storage System?.....	2.49
2.18.2. Terminologies in Storage System Performance	2.50
2.19. Storage Location Strategies.....	2.52
2.19.1. Randomized Storage	2.52
2.19.2. Dedicated Storage	2.53
2.20. Conventional Storage Methods and Equipment	2.53
2.20.1. Bulk Storage.....	2.54
2.20.2. Rack Systems	2.55
2.20.3. Shelves and Bins	2.56
2.20.4. Drawer storage	2.57
2.20.5. Automated Storage Systems.....	2.57
2.21. Automated Storage / Retrieval System (AS/RS).....	2.58
2.21.1. Fixed-Aisle Automated Storage/Retrieval Systems	2.58
2.21.2. Types of AS/RS	2.59
2.21.3. Applications of AS/RS	2.60
2.21.4. Components and Operating Features of AS/RS	2.61
2.22. Carousel Storage System	2.61
2.22.1. Types of Carousel Systems.....	2.62
2.22.2. Applications of Carousel Systems.....	2.64
2.23. Deadlocks in Automated Manufacturing Systems	2.65
2.23.1. What is a Deadlock in AMS?	2.65
2.23.2. Reasons for Deadlock Occurrence	2.65
2.23.3. Impact of Deadlocks.....	2.66
2.23.4. Deadlock Detection, Prevention and Avoidance	2.66
2.24. Petri Net Models.....	2.67
2.24.1. What are Petri Nets?.....	2.67
2.24.2. Components of a Petri Net	2.67
2.24.3. How Do Petri Nets Work?.....	2.68
2.24.4. Example of a Petri Net	2.68
2.25. Applications of Petri Nets in Dead Lock Avoidance	2.68
2.26. Smart Manufacturing.....	2.71
2.26.1. What is Smart Manufacturing?	2.71
2.26.2. Elements of Smart Manufacturing	2.71

2.26.3. Framework of Smart Manufacturing.....	2.72
2.26.4. Advantages of Smart Manufacturing.....	2.73
2.26.5. Applications of Smart Manufacturing.....	2.74
2.27. Industry 4.0.....	2.74
2.27.1. Introduction.....	2.74
2.27.2. Components of Industry 4.0.....	2.75
2.27.3. Applications of Industry 4.0.....	2.79
2.28. Digital Manufacturing.....	2.79
2.28.1. Types of Digital Manufacturing.....	2.79
2.28.2. Key Elements of Digital Manufacturing.....	2.80
2.28.3. Applications and Benefits.....	2.81
2.29. Virtual Manufacturing.....	2.81
2.29.1. What is Virtual Manufacturing?.....	2.81
2.29.2. Components of Virtual Manufacturing.....	2.81
2.29.3. Applications of Virtual Manufacturing.....	2.82
Two Marks Questions & Answers.....	2.83
Review Questions.....	2.93

UNIT III: GROUP TECHNOLOGY AND FMS..... 3.1 - 3.117

3.1. Introduction.....	3.1
3.1.1. What is Group Technology (GT)?.....	3.1
3.2. Role of Group Technology in CAD/CAM Integration.....	3.2
3.3. Part Families.....	3.3
3.3.1. Illustration of the Part Family Concept.....	3.3
3.4. Methods for Part Family Formation.....	3.5
3.5. Visual Inspection Method.....	3.5
3.6. Parts Classification and Coding Method.....	3.6
3.6.1. Design and Manufacturing Attributes.....	3.6
3.6.2. Coding System Structure.....	3.7
3.7. Coding Systems.....	3.12
3.7.1. Opitz Classification System.....	3.12
3.7.2. The MICLASS System.....	3.17
3.8. Production Flow Analysis (PFA).....	3.18
3.8.1. What is it?.....	3.18
3.8.2. Steps Involved in PFA.....	3.18
3.8.3. Exceptional Parts and Bottleneck Machines.....	3.21
3.8.4. Advantages of PFA.....	3.22
3.8.5. Disadvantages of PFA.....	3.22

3.9. Benefits of Group Technology.....	3.22
3.9.1. Advantages of Group Technology	3.24
3.9.2. Limitations of GT.....	3.25
3.10. Cellular Manufacturing.....	3.25
3.10.1. What is it?	3.25
3.10.2. Reasons for Establishing Manufacturing Cells (Benefits of Cellular Manufacturing).....	3.25
3.11. Composite Part Concept.....	3.26
3.12. Machine Cell Design	3.28
3.12.1. Types of Machine Cells and Layouts	3.28
3.12.2. Summary	3.33
3.12.3. Types of Part Movements Vs. Machine Layout Types.....	3.33
3.12.4. Factors Influencing Cell Layout.....	3.34
3.13. Key Machine Concept.....	3.35
3.14. Quantitative Analysis in Cellular Manufacturing.....	3.36
3.15. Grouping Parts and Machines into Families	3.36
3.15.1. Rank Order Clustering (ROC) Algorithm	3.36
3.16. Arranging Machines in a GT Cell	3.50
3.16.1. Hollier Method 2.....	3.51
3.17. Performance Measures for Machine Sequences in a GT Cell.....	3.52
3.18. Introduction to FMS.....	3.58
3.18.1. What is an FMS?.....	3.59
3.18.2. FMS Vs Other Manufacturing Systems	3.59
3.19. Flexibility and its Types.....	3.61
3.19.1. What is meant by Flexibility in Manufacturing?.....	3.61
3.19.2. Tests of Flexibility.....	3.61
3.19.3. Types of Flexibility	3.62
3.19.4. Comparison of Four Tests of Flexibility in a Manufacturing System and the Seven Types of Flexibility.....	3.65
3.20. Types of FMS.....	3.65
3.20.1. Classification of FMS based on the kinds of operations they perform	3.66
3.20.2. Classification of FMS Based on the Number of Machines in the System ...	3.66
3.20.3. Classification of FMS Based on Level of Flexibility.....	3.70
3.21. Architecture of FMS (Components/Elements of FMS).....	3.71
3.21.1. Components/Elements of FMS	3.71
3.21.2. Flow Chart of FMS Operations.....	3.72
3.22. FMS Workstations	3.73
3.23. Material Handling and Storage System	3.76

3.23.1. Functions of the Material handling System.....	3.77
3.23.2. FMS Layout Configurations	3.77
3.23.3. Material Handling Equipment.....	3.81
3.23.4. Types of Material Handling Equipment	3.82
3.24. Computer Control System.....	3.86
3.24.1. Functions of a FMS Computer Control System	3.86
3.24.2. Structure of FMS Application Software Systems.....	3.88
3.24.3. FMS Data Files	3.88
3.24.4. FMS Performance Reports.....	3.89
3.25. Human Resources	3.89
3.26. Example of Flexible Manufacturing System.....	3.90
3.27. Applications and Benefits of FMS	3.92
3.27.1. FMS Applications.....	3.92
3.27.2. Economics of FMS.....	3.92
3.27.3. Advantages of FMS (Benefits of FMS).....	3.92
3.27.4. Disadvantages of FMS	3.93
3.28. Quantitative Analysis of Flexible Manufacturing System	3.94
3.29. Bottleneck Model.....	3.95
3.29.1. Terminology and Symbols	3.95
3.29.2. FMS Operational Parameters	3.96
3.29.3. System Performance Measures	3.97
<i>Two Marks Questions and Answers.....</i>	<i>3.106</i>
<i>Review Questions.....</i>	<i>3.114</i>

UNIT IV: PROCESS PLANNING

4.1 – 4.66

4.1. Introduction.....	4.1
4.1.1. What is Process Planning?	4.1
4.1.2. Process Planning Defined.....	4.1
4.1.3. Role of Process Planning in CAD/CAM Integration	4.2
4.1.4. Responsibilities of Process Planning Engineer	4.2
4.2. Activities In Process Planning.....	4.3
4.2.1. Drawing Interpretation	4.4
4.2.2. Material Evaluation and Process Selection	4.4
4.2.3. Selection of Machines, Tooling and Work-holding Devices	4.5
4.2.4. Selecting Process Parameters	4.6
4.2.5. Selecting Quality Assurance Methods.....	4.7
4.2.6. Cost Estimating	4.7
4.2.7. Process Planning Documentation.....	4.7

4.2.8. Communicate Process Knowledge.....	4.9
4.3. Information Required for Process Planning	
(Set of Documents Required for Process Planning)	4.10
4.3.1. Inputs and Outputs of Process Planning.....	4.11
4.4. From Design to Process Planning	4.12
4.4.1. Process Planning: Link between Design and Manufacturing.....	4.12
4.4.2. From Design to Process Planning.....	4.12
4.5. Classification of Manufacturing Processes	4.14
4.5.1. Forming from Liquid (Casting, Molding).....	4.16
4.5.2. Forming from Solid by Deformation.....	4.16
4.5.3. Forming from Solid by Material Removal.....	4.19
4.5.4. Forming by Joining Parts.....	4.22
4.5.5. Forming by Assembly.....	4.22
4.5.6. Forming by Material Increase (Additive Manufacturing).....	4.22
4.6. Selection of Primary Manufacturing Processes	4.23
4.6.1. Factors to be Considered in the Selection of Manufacturing Processes.....	23
4.6.2. Manufacturing Process Selection Method.....	4.25
4.7. Sequencing of Operations According to Anteriorities	4.29
4.7.1. What is Anteriority?.....	4.29
4.7.2. Preliminary Analysis of a Mechanical Part.....	4.30
4.7.3. Selection of Machining Processes, Tools and Cutting Parameters.....	4.32
4.7.4. Grouping of Processes into Job.....	4.32
4.7.5. Sequencing of Operations according to Anteriorities.....	4.33
4.8. Examples of Different Types of Anteriorities	4.33
4.8.1. Example 1: A Case of Dimensional Precedence.....	4.33
4.8.2. Example 2: A Case of Geometric Precedence.....	4.34
4.8.3. Example 3: A Case of Datum Choice.....	4.34
4.8.4. Example 4: A Case of Technological Constraint.....	4.35
4.8.5. Example 5: A Case of Burr.....	4.35
4.8.6. Example 6: A Case of Economic Constraints.....	4.36
4.9. Forming of Matrix of Anteriorities	4.37
4.10. Case study	4.39
4.11. Typical Process Sheet	4.42
4.12. Approaches to Process Planning	4.43
4.13. Manual Process Planning	4.44
4.13.1. Traditional Approach.....	4.44
4.13.2. Workbook Approach.....	
4.13.3. Advantages of Manual Process Planning.....	4.45
4.13.4. Disadvantages of Manual Process Planning.....	4.45

4.13.5. Case Studies in Manual Process Planning.....	4.45
4.14. Computer Aided Process Planning (CAPP).....	4.47
4.14.1. Benefits of CAPP.....	4.47
4.14.2. Approaches of CAPP.....	4.48
4.15. Process Planning Module and Data Base.....	4.48
4.15.1. Role of Process Planning Module.....	4.48
4.15.2. Importance of Databases in Process Planning.....	4.49
4.16. Variant (or Retrieval) CAPP System.....	4.50
4.16.1. What is a Variant CAPP System?.....	4.50
4.16.2. Two Stages in Variant Process Planning.....	4.50
4.16.3. Advantages of Retrieval CAPP System.....	4.52
4.16.4. Drawbacks of Retrieval CAPP System.....	4.52
4.16.5. Some Commercial Variant CAPP Systems.....	4.53
4.17. Generative CAPP System.....	4.54
4.17.1. What is a Generative CAPP System?.....	4.54
4.17.2. Components of a Generative CAPP System.....	4.54
4.17.3. Advantages of Generative CAPP.....	4.55
4.17.4. Drawbacks of Generative CAPP System.....	4.55
4.17.5. Some Commercial Generative CAPP Systems.....	4.55
4.17.6. Selection of a CAPP System.....	4.56
4.18. Flow Chart showing various Activities in Generative CAPP System.....	4.57
4.19. Semi Generative Process Planning.....	4.59
4.20. Comparison of CAPP and Manual Process Planning.....	4.59
<i>Two Marks Questions and Answers.....</i>	<i>4.60</i>
<i>Review Questions.....</i>	<i>4.66</i>

UNIT V: PROCESS CONTROL AND DATA ANALYSIS

5.1 – 5.71

5.1. Concept of Automation.....	5.1
5.2. Basic Elements of an Automated System.....	5.1
5.2.1. Power.....	5.2
5.2.2. Program of Instructions.....	5.2
5.2.3. Control System.....	5.3
5.3. Levels of Automation.....	5.4
5.4. Introduction to Process Model Formulation.....	5.6
5.4.1. Introduction.....	5.6
5.4.2. Formulation of Process Model.....	5.8
5.5. Linear Feedback Control Systems (Regulatory Control).....	5.10
5.6. Feedback Control System.....	5.11

5.7. Optimal Control (Steady State Optimization)	5.12
5.8. Adaptive Control	5.13
5.8.1. Three Primary Functions of Adaptive Control System	5.14
5.9. Sequence Control	5.16
5.9.1. Introduction to Sequence Control	5.16
5.9.2. Key Components of Sequence Control	5.17
5.10. Programmable Logic Controller (PLC)	5.18
5.10.1. What is a Programmable Logic Controller (PLC)?.....	5.18
5.10.2. Advantages of PLCs over Traditional Control Systems.....	5.19
5.10.3. Components of a PLC	5.19
5.10.4. How a PLC Works.....	5.21
5.11. Supervisory Control And Data Acquisition (SCADA)	5.22
5.11.1. What is Supervisory Control?	5.22
5.11.2. What is SCADA: Supervisory Control and Data Acquisition?	5.23
5.11.3. How SACDA Works?.....	5.24
5.11.4. Role of SCADA in Industrial Automation	5.25
5.11.5. SCADA vs. Process-Level Control Systems (such as PLCs).....	5.25
5.12. Computer Process Control	5.26
5.12.1. Introduction to Real-Time Control System	5.26
5.12.2. Control Requirements	5.26
5.12.3. Capabilities of Computer Control Systems	5.27
5.12.4. Levels of Computer Process Control	5.30
5.13. Computer Process Monitoring	5.32
5.13.1. What is Computer Process Monitoring?	5.32
5.13.2. Components of a Computer Process Monitoring System	5.32
5.13.3. Different Configurations of Computer Process Monitoring System	5.33
5.14. Direct Digital Control	5.35
5.14.1. What is Direct Digital Control (DDC)?	5.35
5.14.2. Analog Control vs. Direct Digital Control	5.36
5.14.3. How DDC Operates	5.38
5.14.4. Advantages of DDC	5.38
5.15. Supervisory Computer Control	5.38
5.15.1. What is Supervisory Control?	5.38
5.15.2. Key Characteristics of Supervisory control	5.39
5.15.3. Supervisory Control in Process Industries	5.40
5.15.4. Supervisory Control in Discrete Manufacturing	5.40
5.16. Computer Process Interface	5.41
5.16.1. What is Computer Process Interface?	5.41
5.16.2. Manufacturing Process Data	5.41

5.16.3. System Interpretation of Process Data	5.42
5.17. Interface Hardware.....	5.43
5.18. Overview of Automatic Identification Methods	5.45
5.18.1. Introduction	5.45
5.18.2. Reasons for Using Automatic Identification Techniques	5.46
5.18.3. Applications of Automatic Identification Techniques	5.46
5.18.4. Basic Components of Automatic Identification Technologies	5.46
5.18.5. Types of Automatic Identification Technologies.....	5.47
5.19. Bar Code Technology.....	5.49
5.19.1. Introduction	5.49
5.19.2. Bar Codes	5.50
5.19.3. Types of Bar Codes	5.50
5.19.4. Bar Code Symbols.....	5.52
5.19.5. Bar Code Scanner.....	5.53
5.19.6. Summary of Various Automatic Identification Systems	5.54
5.20. Automatic Data Capture Technologies	5.56
5.20.1. Radio Frequency Identification (RFID)	5.57
5.20.2. Optical Character Recognition (OCR)	5.57
5.20.3. Magnetic Stripe Cards.....	5.57
5.20.4. Smart Cards (Chip Cards)	5.58
5.20.5. Biometric Data Capture.....	5.58
5.20.6. Voice Recognition	5.58
5.20.7. Machine Vision	5.58
5.20.8. Advantages of ADC Technologies	5.59
5.20.9. Applications of ADC Technologies across Industries	5.59
5.21. Quality Management (SPC) and Automated Inspection	5.59
5.21.1. Quality Management with Statistical Process Control (SPC).....	5.59
5.21.2. Automated Inspection.....	5.61
