

CONTENTS

UNIT I

WATER SUPPLY	1.1 - 1.60
1.1. Introduction	1.1
1.1.1. Sources of Water.....	1.1
1.1.2. Surface Waters	1.1
1.1.3. Underground Sources.....	1.4
1.2. Estimation of Surface and Subsurface Water Resources	1.8
1.2.1. Water Availability Analysis:.....	1.8
1.2.2. Flow Duration Curves.....	1.9
1.2.3. Important Characteristics of a Flow Duration Curve :.....	1.11
1.2.4. Uses of Flow Duration Curves :.....	1.11
1.3. Water Balance (or Budget).....	1.11
1.3.1. Hydrological Water Balance.....	1.12
1.4. Ground Water Resources Evaluation	1.12
1.4.1. Unconfined Aquifers.....	1.13
1.4.2. Confined Aquifers.....	1.13
1.5. Ground Water Balance.....	1.13
1.5.1. Ground Water Balance Equation	1.14
1.5.2. Estimation of Ground Water Balance Components.....	1.14
1.6. Predicting Demand for Water.....	1.16
1.6.1. Types of Water Demand:.....	1.17
1.6.2. Water Quantity Estimation:	1.19

1.6.3. Factors Affecting per Capita Demand:	1.20
1.6.4. Fluctuations in Rate of Demand:	1.20
1.6.5. Design Periods & Population Forecast	1.21
1.6.6. Population Forecasting Methods.....	1.22
1.7. Impurities of Water and their Significance	1.30
1.7.1. Classification on the basis of Properties or Characteristics of Impurities	1.30
1.7.2. Classification on the basis of the State of Presence/Occurrences	1.31
1.8. Water Quality	1.32
1.8.1. Physical Characteristics	1.32
1.8.2. Chemical Characteristics:	1.33
1.8.3. Bacteriological Characteristics:	1.35
1.9. Waterborne Diseases.....	1.36
1.9.1. Water-Borne Diseases and their Impact	1.37
1.9.2. Mitigation and Prevention.....	1.39
1.10. Standards for Potable Water	1.39
1.10.1. Characteristics of Potable Water:.....	1.42
1.10.2. Methods to make Potable Water:.....	1.42
1.11. Intake of Water: Pumping and Gravity Schemes	1.42
1.11.1. Site for Location of Intake	1.43
1.11.2. Design Consideration of Intake:	1.43
1.11.3. Components of Water Supply scheme	1.44
1.11.4. Types of Intake Structures	1.45
Solved Problems	1.49
Two Mark Questions and Answers.....	1.53
Review Questions.....	1.58

UNIT II

WATER TREATMENT

2.1 - 2.78

2.1. Introduction	2.1
2.1.1. Objectives	2.1
2.1.2. Unit Operations (UO):	2.2
2.1.3. Unit Process (UP):	2.2
2.1.4. Principles, Functions, and Design of Water Treatment Plant Units:	2.3
2.2. Aerators of Flash Mixers	2.5
2.2.1. Types of Aerators.....	2.7
2.3. Coagulation and Flocculation	2.9
2.3.1. Sedimentation Theory.....	2.11
2.4. Plate and Tube Settlers (Lamella Clarifier)	2.15
2.4.1. Design of Tube Settlers.....	2.17
2.5. Pulsator Clarifier.....	2.18
2.6. Filtration	2.20
2.6.1. Filter Materials.....	2.21
2.6.2. Types of Filter.....	2.21
2.6.3. Slow Sand Filtration:	2.21
2.6.4. Rapid Sand Filter	2.24
2.7. Pressure Filter	2.27
2.8. Disinfection	2.30
2.9. Removal of Iron and Manganese from Water.....	2.40
2.10. Defluoridation.....	2.40
2.10.1. Methods of Defluoridation:.....	2.41

2.11. Water Softening.....	2.45
2.11.1. Methods of Removing Temporary Hardness:.....	2.45
2.11.2. Methods of Removing Permanent Hardness:	2.46
2.11.3. Lime Soda Process:.....	2.46
2.11.4. Zeolite Process (Permutit Process)	2.49
2.11.5. Demineralization:.....	2.52
2.12. Desalination.....	2.54
2.12.1. Classification of Salt Water	2.55
2.12.2. Methods of Desalination:.....	2.55
2.13. Residue Management.....	2.60
2.13.1. Residual Categorization.....	2.60
2.13.2. Regulatory Requirements.....	2.61
2.13.3. Treatment Options	2.62
Solved Problems	2.62
Design Examples on Sedimentation Tanks.....	2.62
Two Mark Questions and Answers.....	2.69
Review Questions.....	2.75

UNIT III

WATER STORAGE AND DISTRIBUTION

3.1 - 3.63

3.1. Requirements of a Good Distribution System	3.1
3.2. Storage and Balancing Reservoirs	3.1
3.3. Storage Capacity of Distribution Reservoirs.....	3.7
3.4. Distribution System – Layout.....	3.12
3.4.1. Methods of Distribution.....	3.17

3.5. Hydraulics of Pipelines	3.20
3.6. Pipe Fittings	3.26
3.6.1. Apparatus in Distribution System	3.30
3.7. Leakage Detection in Underground Distribution Pipes.....	3.40
3.8. Distribution System and their Maintenance.....	3.42
3.9. Pumping Station	3.46
3.9.1. Types and Structure of Pumping Stations.....	3.46
3.10. House Service Connection	3.51
3.11. Analysis of Distribution Systems	3.54
Two Mark Questions and Answers.....	3.56
Review Questions.....	3.61

UNIT IV

PLANNING AND DESIGN OF SEWERAGE SYSTEM	4.1 - 4.81
---	-------------------

4.1. Introduction	4.1
4.1.1. Stages of Sanitary Engineering Project.....	4.1
4.1.2. Objectives of Sanitary Engineering	4.2
4.1.3. Effects of Sewage on Environment.....	4.2
4.2. Important Terms	4.3
4.3. Relative Stability	4.19
4.4. Net Quantity of Sewage Produced	4.21
4.5. Design Periods and Future Forecasts	4.22
4.6. The Important Factors must be considered are	4.25
4.7. The Various Commonly Used Materials Are	4.26
4.8. Maximum and Minimum Velocities to be Generated in Sewers	4.32

4.8.1. Self Cleansing Velocity	4.32
4.8.2. Non Scouring Velocity	4.32
4.9. Hydraulic Characteristics of Circular Sewer Sections	
Running Full or Partially Full	4.33
4.10. Rational Method.....	4.44
4.11. Emperical Method.....	4.45
4.12. Manholes	4.53
4.12.3. Lamp Holes.....	4.58
4.12.4. Clean - Outs	4.59
4.12.5. Gullies.....	4.59
4.12.6. Catch Basins (or) Catch Pits	4.60
4.12.7. Flushing Tanks.....	4.61
4.12.8. Grease and Oil Traps	4.62
4.12.9. Inverted Siphons	4.62
4.13. Storm Water Regulators or Storm Relief Works.....	4.64
4.13.1. Leaping Weir	4.64
4.13.2. Overflow Weir	4.65
4.14. Prevention & Control.....	4.66
4.15. Pumps for Lifting Sewage.....	4.67
4.15.1. Necessity of Pumping Sewage.....	4.67
4.15.2. Types of Pumps.....	4.67
4.16. System of Pumbing.....	4.70
4.16.1. Two Pipe System	4.70
4.16.2. One Pipe System	4.72
4.16.3. Single Stack System.....	4.73
4.16.4. Partially Ventilated Single Stack or Single Pipe System.....	4.74
4.17. Rain Water Harvesting.....	4.75

4.17.1. Methods.....	4.76
4.17.2. Recharging Subsurface Aquifers	4.77
Two Mark Questions and Answers.....	4.77
Review Questions.....	4.80

UNIT V

SEWAGE TREATMENT AND DISPOSAL	5.1 - 5.76
--------------------------------------	-------------------

5.1. Criteria for Selection of Treatment Methods	5.1
5.2. Activated Sludge Process	5.3
5.3. Trickling Filter	5.10
5.4. Sequencing Batch Reactor.....	5.31
5.5. Usab (Upflow Anaerobic Sludge Blanket Reactor) Reactor	5.35
5.6. Advances in Sewage Treatment	5.39
5.7. Reclamation and Reuse of Sewage Wastewater	5.42
5.8. Discharge Standards:.....	5.43
5.9. Sludge Treatment and Disposal	5.45
Solved Problem.....	5.49
5.9.1. Sludge Thickening	5.49
5.9.2. Sludge Digestion.....	5.53
5.9.3. Sludge Dewatering.....	5.64
5.9.4. Sludge Drying Bed.....	5.69
Two Mark Questions and Answers.....	5.71
Review Questions.....	5.75
Model Question Papers.....	MQ.1 - MQ.9
